# 1 Uvod

## 1.1 programski jezici

Za izradu sajta su korišćeni HTML, CSS, Javascript, Jquery biblioteka javascripta i Bootstrap.

## 1.2 Opis funkcionalnosti

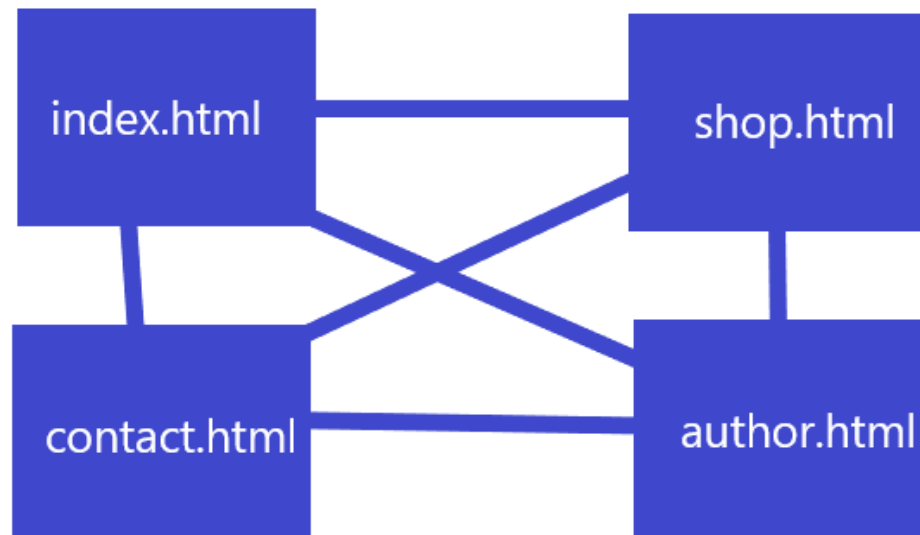

- Dinamicko ispisivanje headera i footera zajedno sa navigacionim menijem unutar headera
- Dinamicko ispisivanje proizvoda iz products.json fajla putem ajaxa i Javascript funkcije za ispis
- Dodavanje proizvoda u korpu
- Sortiranje i filtriranje proizvoda po određenim kriterijumima koje bira korisnik
- Dugmad za proširivanje i smanjivanja količine teksta na određenim delovima stranica
- "Scroll to top" dugme na dnu svake stranice koje vraća korisnika na vrh
- Uz bootstrap su svi elementi stranica prilagođeni veličini uređaja
- Hvatanje grešaka pri komunikaciji sa JSON fajlovima
- Prikazivanje grešaka prilikom upisa podataka na contact stranici korišćenjem regularnih izraza
- Navigacija se pretvara u toggle dugme na manjim veličinama ekrana.
- Filtriranje

## 1.3 Template

Template nije korišćen. Delovi css-a iz sajta za web programiranje 1 su ponovo iskorišćeni.

## 2 Organizacija

### 2.1 Šema

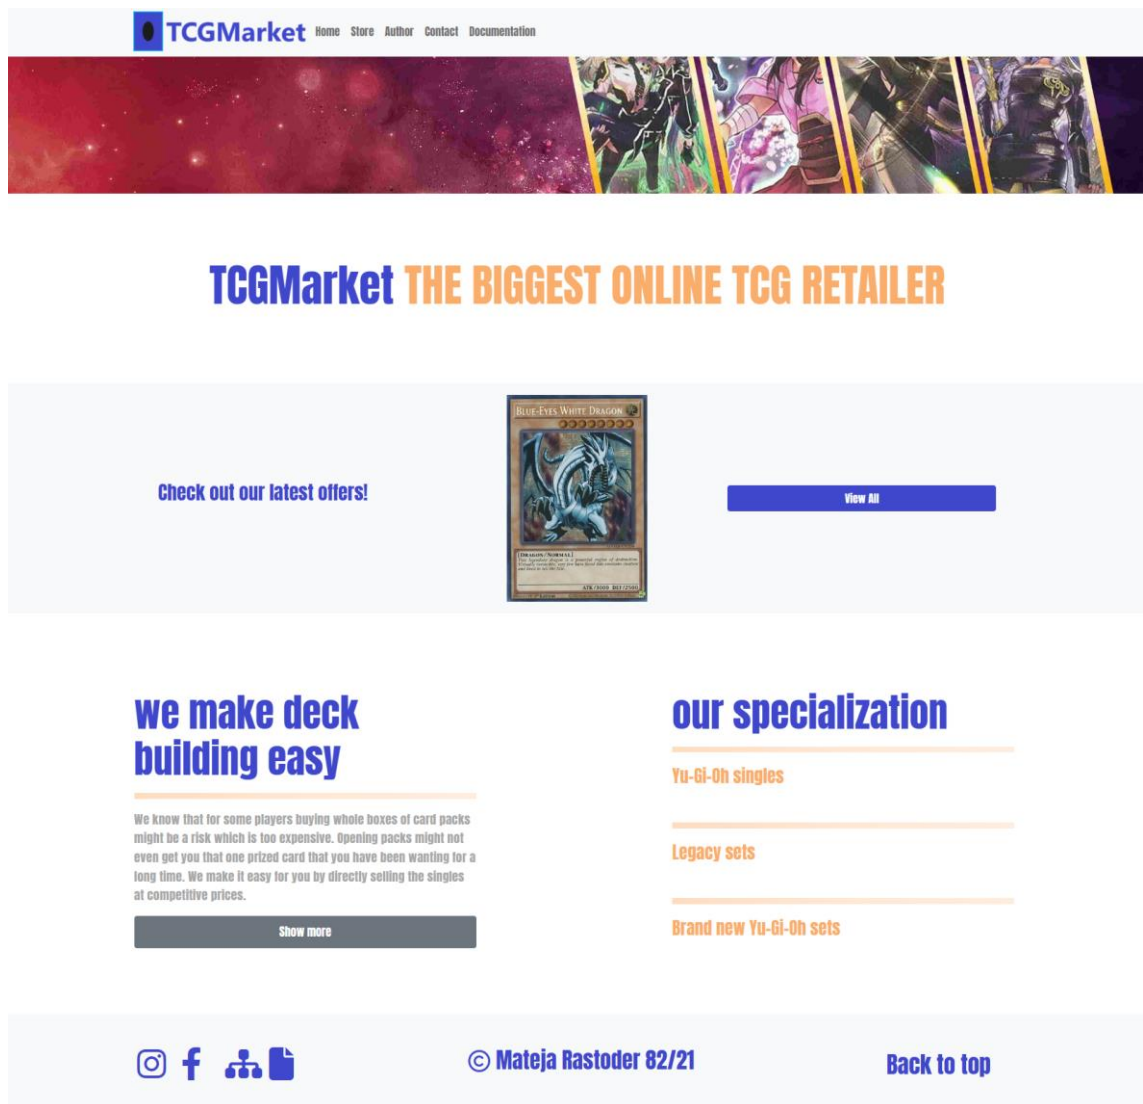

### 2.2 Mapa Sajta

```

  </url>
```

### 3 Izgled i opis stranica

#### 3.1 index.html

Na početnoj strani korisnike čeka baner koji menja slike banera kolekcija na određeni vremenski period.

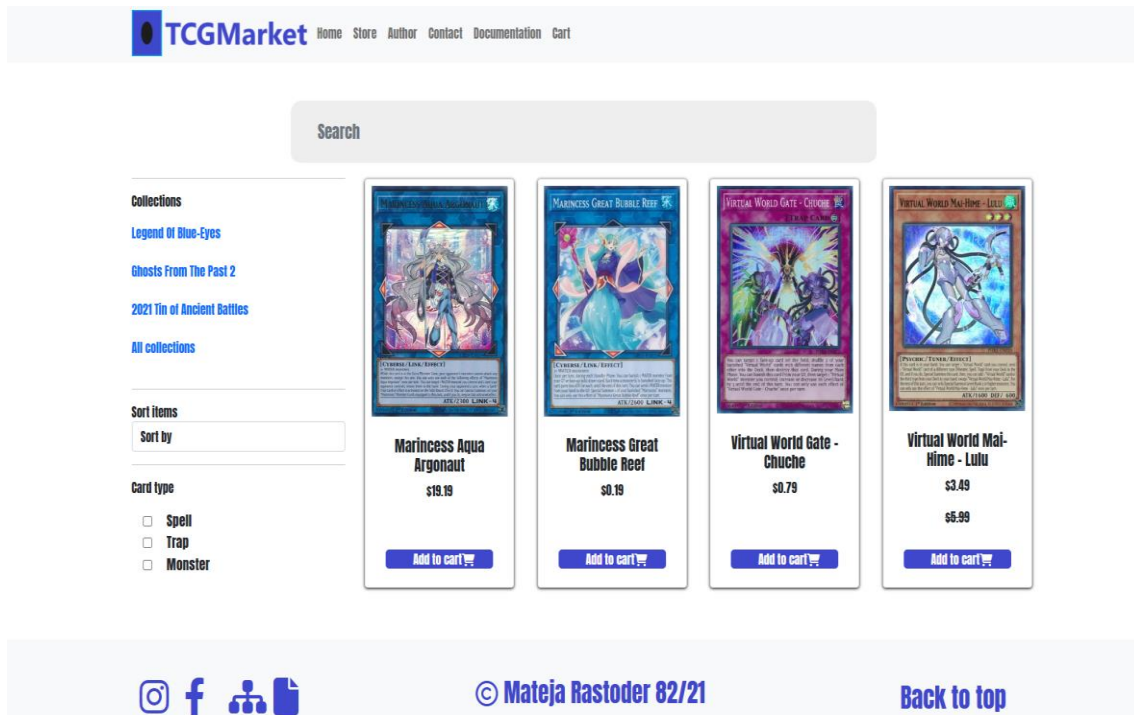

Dinamički se ispisuje u banner sekciji putem funkcije. Nakon banera vidi se slogan kompanije i reklama za najnoviji proizvod sa dugmetom koje nas vodi na stranicu shop.html.

Ispod toga se nalazi about sekcija koja naglašava prednosti koje kupci imaju korišćenjem naših usluga i u levom delu opis biznis modela. Klikom na "Show more" dugme prikazuje se više ili klikom "Show less" se prikazuje manje teksta.

Na footeru postoji link Back to top koji klikom vodi korisnika na vrh stranice. Header i footer se dinamički učitavaju i prilagođavaju po veličini ekrana.

Navigacija se pretvara u toggle dugme na manjim veličinama ekrana.

### 3.2 Store.html

Na ovoj stranici se prikazuju svi proizvodi i filtriraju i sortiraju po izabranim kriterijumima.

Uz pomoć LocalStorage se pamte selekcije i sort i filter funkcija i rade uporedno.

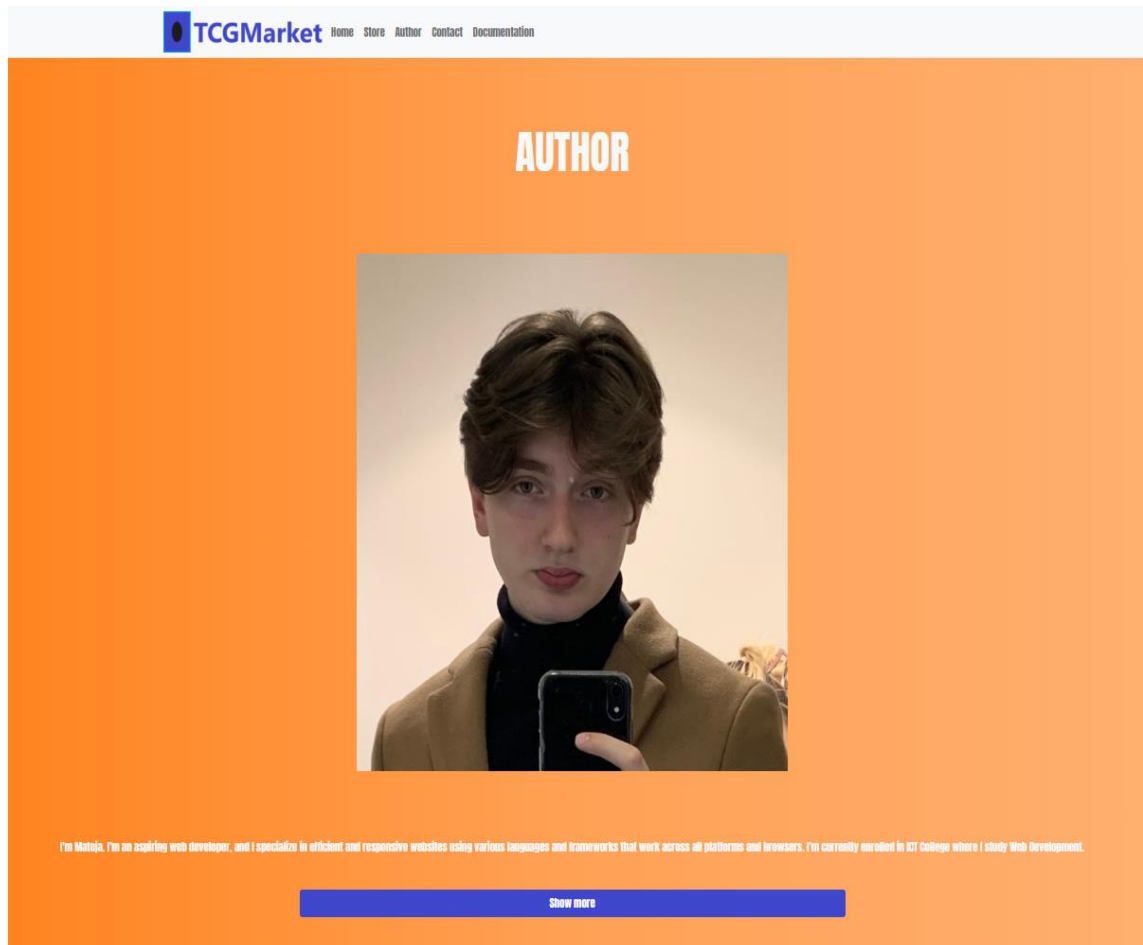

Card type checkboxovi se primenjuju nad kartama koje su već isfiltrirane po kolekciji i sortiranje radi nad svim sortovima.

Search ignoriše sort i filter jer je taj način filtriranja po pretrazi intuitivniji.

Tako se korisnicima daje izbor pretrage ako znaju šta im tačno treba ili ako nisu sigurni mogu da koriste filter i sort.

Broj elemenata po redu je prilagođen veličini ekrana.

### 3.3 author.html

Stranica sa detaljima o autoru. Sadrži podatke o njemu i dugme za prikazivanje manje ili više njih.

Ukoliko posetilac klikne show more prikazaće se još teksta i link koji vodi ka autorovoj portfolio stranici na drugom sajtu.

### 3.4 contact.html

The screenshot shows the TCGMarket contact form with the following elements and errors:

- Header:** TCGMarket logo and navigation links: Home, Store, Author, Contact, Documentation.
- Title:** Contact us!
- First Name:** Input field containing 'a'. Error: Enter valid name! (red text below the field).
- Last Name:** Input field containing 'a'. Error: This field is required! (red text below the field).
- Email:** Input field containing 'd'. Error: Enter valid e-mail! (red text below the field).
- Confirm Email:** Input field containing 'a'. Error: Please confirm with correct e-mail! (red text below the field).
- Date Of Birth:** Three dropdown menus for Year, Month, and Day. Each dropdown has a red asterisk (\*) next to it.
- Gender:** Three radio buttons labeled Male, Female, and Other. Error: Please choose gender! (red text below the buttons).
- Submit:** A large orange button labeled Submit.

Contact stranica koristi formu i regularne izraze.

Ukoliko podaci nisu validni ispisaće se odgovarajuća greška koja će pomoći korisniku da ispravi podatke.

Npr. Ukoliko je ime upisano bez početnog velikog slova ili uopšte nije upisano prikazaće se različite greške.

Greške se ispisuju samo prilikom klika na Submit dugme da ne bi bile previše napadne korisnicima za vreme upisa podataka.
